MICHAEL DAVIDS

Full-Stack Software Engineer & Technical Consultant

Cape Town, South Africa | 073 152 9691 | michaelcdavids@gmail.com | michaelcdavids.github.io

PROFESSIONAL PROFILE

Resilient Full-Stack Software Engineer with over 5 years of professional experience architecting robust web, mobile, and cloud applications. Certified in enterprise Java (OCA) and AWS Cloud, with deep technical proficiency across Flutter, React, Node.js, PostgreSQL, and automated workflow pipelines. Proven track record of taking complex products from initial concept to production deployment, balancing technical rigor with enterprise operational excellence, high-stakes communication, and clean, maintainable code architecture.

TECHNICAL EXPERTISE

- **LANGUAGES:** Java (OCA Certified), Dart, JavaScript, SQL, MQL5
- **BACK-END & DATA:** Node.js, ExpressJS, RESTful API's, Micro-services, PostgreSQL, MongoDB
- **ENTERPRISE SYSTEMS:** Blue Prism (RPA), SAP, Power BI, Genesys, Microsoft Power Apps
- **FRONT-END & UI:** Flutter, React 18, Next.js, Zustand, Tailwind CSS, TanStack Query
- **CLOUD & DEVOPS:** AWS (Certified Practitioner), Docker, GitHub Actions, DigitalOcean
- **ENGINEERING PRACTICES:** Agile/Scrum, CI/CD Pipelines, Unit Testing, State Management

WORK HISTORY

Customer Service Expert (Aviva) | TeleperformanceSA

May 2026 – Present
(Cape Town)

- Investigate and resolve complex technical policy queries, formal customer complaints, and objections regarding legal insurance transfers.
- Manage enterprise workflows, omnichannel queuing via Genesys, and Microsoft Power Apps to update policyholder accounts and log case metrics.
- Execute strict agent-level identity checks and Data Protection Act (DPA) compliance protocols prior to handling sensitive customer files.

Lead Software Consultant | AwethenticSA

2023 – 2026
(Remote)

- Leading full-stack strategy and custom component library engineering (Mute-UI) using React, Tailwind CSS, and Typescript.
- Architect proprietary financial technology assets, e-commerce platforms, and back-end micro-services in Java and Node.js.
- Integrating secure third-party payment gateways and managing cloud deployment infrastructure.

Business & Integration Architecture Analyst | Accenture

2021 – 2023
(Cape Town)

- Led enterprise Robotic Process Automation (RPA) implementation (Blue Prism) for workflow optimization on major client engagements (Sasol).
- Managed AWS cloud infrastructure and integrated complex SAP data pipelines to automate legacy operations.
- Designed technical flowcharts and built operational reporting dashboards in Power BI and SQL to track performance metrics.

Full Stack Developer | Konvi (Pty) Ltd

2019 – 2020
(Remote)

- Developed cross-platform mobile app using Flutter/Dart, implementing robust client-side state management.
- Engineered back-end server logic, REST API endpoints, and database schemas in Node.js, Express, and MongoDB.
- Managed the full application life-cycle, debugging cross-tier issues and preparing builds for app store readiness.

Customer Service Advisor / Associate | Webhelp SA & Amazon.com

2014
(Cape Town)

- Managed international query resolution, order processing, and North American retail support across voice and chat channels.

Machine Operator | G.U.D Holdings

2013
(Cape Town)

- Maintained high precision standards and operational compliance in a strict manufacturing environment.

EDUCATION & CERTIFICATIONS

• Oracle Certified Associate (OCA), Java SE 8 Programmer — Oracle (2020–2021)
• AWS Certified Cloud Practitioner — Amazon Web Services (2021)
• Full-Stack Software Development Certification — project codeX, Cape Town (2018)
• BSc Computer Science (Foundational) — UWC
• Short Course on Leadership — Stellenbosch University (2017)
